

Certificate of Climate Contribution

It is hereby certified that

On-Site Exhibitions AB

Have purchased

26 ton carbon credits

Through Climate Hero, a portfolio of **Gold Standard** certified projects are supported. The projects accelerates the transition to renewable energy and prevents new CO2 from being added to the atmosphere (Verified Emission Reductions). This is, for example, done by adding solar power and wind power in regions that depend on coal power for electricity production. The Gold Standard means that the climate projects have the very strictest review requirements, regarding proven climate benefits and social improvements.
